TOWER COLOR PORTFOLIO
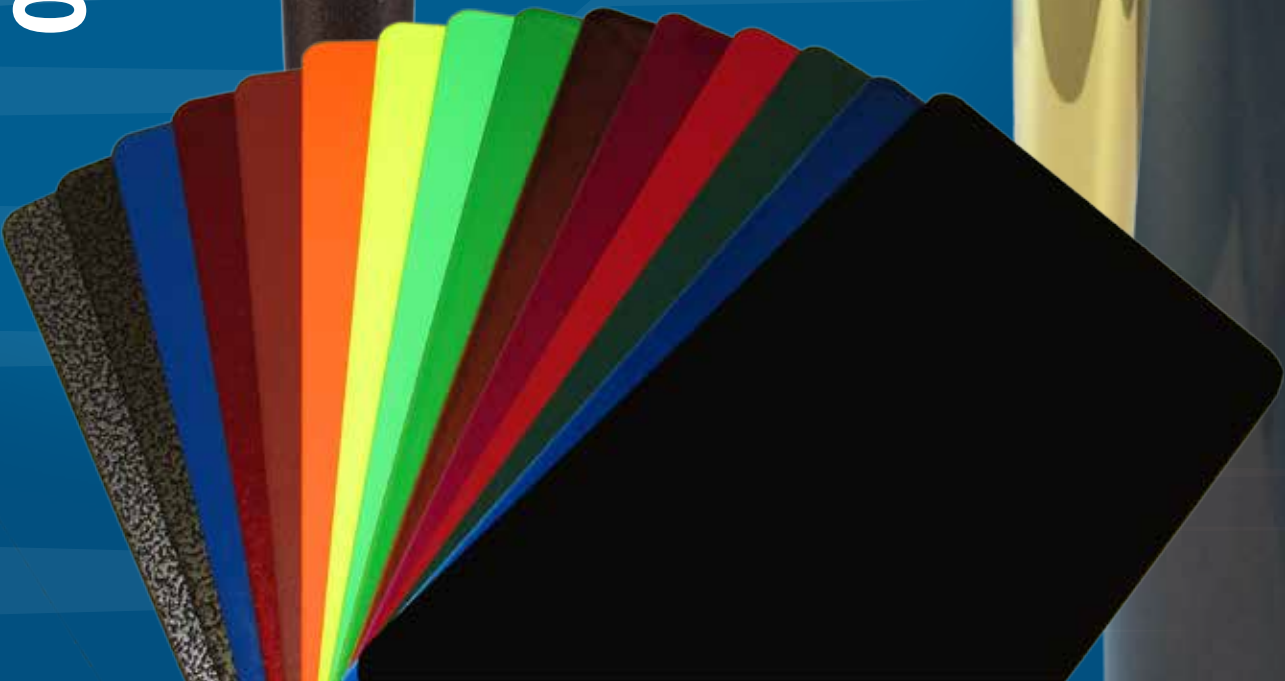

# 2016 PRODUCT HIGHLIGHTS

- PEGAS CrafTap, PEGAS Dragon, PEGAS Evolution
- Custom Branded Kegs - 5L, 10L, 20L, 30L, 50L
- New Colors for Draught Beer Towers

**NEW**

## GROWLER FILLERS & ACCESSORIES

- PEGAS Growler Filler, CrafTap
  Page: 112
- Pegas CraftPad / Pegas CraftPad Light
  Page: 113, 114
- Growler Filling Station
  Page: 115
- Growler Washing Machine
  Page: 116

## STAINLESS STEEL STACKABLE KEGS

- 304 Stainless Steel
- 5L, 10L, 20L, 30L, 50L, 58L
- Stackable and Non-stackable
- Custom Embossing
- Full Line of Accessories

PAGE: 65, 66, 111

## DRAUGHT BEER TOWER COLORS

- Full Line of Colors for Beer Towers
- Customizable Colors
- Can be Applied to Majority of Towers

PAGE: 4

# DRIP TRAYS
# CLAMP-ON DRIP TRAYS

**SS** stainless steel

- Ideal solution for mobile or special event
- Designed for use with various towers
- Available in Chrome or Black finishing
- Stainless Steel drip tray grid

## Clamp-on Drip Trays

| Part No. | Description |
|----------|-------------|
| DTB9 | 9" x 6" clamp-on black |
| DTC9 | 9" x 6" clamp-on chrome |

6"

5"

DTB9

**NOTE: Clamp-on Drip Tray can hold all American, Gothic, Cobra and Milano towers**

Available with Branding on Page 110

**Beer towers**
1 to 14 faucets,
Air or Glycol cooled to reduce foam while pouring

**Drip tray**
Various sizes to fit your counter, glass rinser as an option

# Glycol Power Packs

- Easier to install, service and maintain
- Large condenser for hot ambient conditions
- High-Efficiency Evaporator shaped for optimal use of the glycol bath
- Digital thermostat for easier maintenance
- Environmentally friendly HFC-Free insulation
- 2-Tier Quality control (factory testing and pre-shipment testing)

**Flow-Of-Beer Detector**
Keeps the line full while changing the keg to minimize loss of beer

**Draught Beer Storage 2-3°C (36-38F)**
Beer is stored at the right temperature to preserve its original taste

**Regulator Panel**
Allows different pressures for different beer styles

**Gas Blender**
Blends $CO_2$ and Nitrogen in required proportion to prevent beer deterioration

**Glycol chiller (Power Pack)**
Keeps the temperature of the beer within the Trunk Line and Beer Tower at 2-3°C (36-38F)

**CO2 or Nitrogen Gas Tanks**

**Pre-mixed gas tanks (CO2 + Nitrogen)**

**Trunk line**
4 to 14 beer lines, glycol circulates inside to keep beer temperature 2-3°C (36-38F)

# GLYCOL POWER PACKS

- Vertical or horizontal body for a better use of available space
- Operation distance up to 450 ft
- Digital thermostats on all models
- Optional 6" legs

# Wine-On-Tap System

Wine-on-tap means a perfect pour, every time, for any length of time. Exactly the way the winemaker intended.

- An inert gas pushes the wine out of the keg, preserving the wine remaining in the keg for months.
- Wine will not oxidize and will never be corked or experience bottle variation or any other flaws due to packaging.

# WINE-ON-TAP COOLERS

- Easy-to-install coolers ideal for wine-on-tap dispense
- 316 Stainless Steel product lines suitable for wine dispensing
- Digital thermostat

# DRAUGHT BEER DISPENSE SYSTEM COMPONENTS
# GAS BLENDERS

■ Specially designed to fill the needs of the Canadian and U.S. beer dispensing market
■ McDantum blending panels include gauges to adjust pressure

TM100

## McDantim TrumixTM
## Blending Panel

The McDantim Trumix™ Blending Panel was specifically designed to fill the needs of the U.S. Beer Dispensing Market. The Panel is a small wall-mounted unit that tucks neatly and safely out of the way. It is easy to install and is extremely dependable. The Trumix™ requires no electricity, on-going maintenance or adjustment. It can be used equally well with all sources of clean nitrogen and $CO_2$ including high pressure cylinders, bulk tanks or separators.

McDantum blending panels include gauges to adjust pressure.

TM200

| Part No. | Description |
|----------|-------------|
| TM100 | Single Outlet Blending Panel, up to 15 kegs/hr |

Our 5 lb aluminum alloy CO2 cylinders are certified and stamped for use in the USA (US DOT 3AL) and also Canada TC-3ALM).

# Reach-in Refrigerators

- Large glass surface for increased visibility
- Extra large interior usable space
- Highest climate class - class 4 (outdoor use)
- Branded exterior walls (optional)
- Galvanized steel case primed on both sides and painted on the outer side for increased durability and anti-corrosion

# Smart Cool 350

- Heavy-duty construction
- Energy efficient door frames
- Embraco 1/6 hp compressor

- Digital thermostat
- Forced air Ribbed pipe evaporator
- Illuminated lightbox with a logoed screen

## IceStream Smart Cool

| | |
|---|---|
| Size without packaging H×D×W | 81×23×23 in |

**YOUR BREWERY**

## Kegs

- Available in 5L, 10L, 20L, 30L, 50L, 58L
- Meeting the highest keg standards
- AISI 304 stainless steel
- Generic or Micromatic Spears
- Serial numbers on time chime
- Optional brand embossing
- Stackable or non-stackable

# PEGAS CRAFTAP

- Counter pressure filler for glass growlers
- No foam
- Less than 2% waste
- Long beer shelf life

## Pegas CrafTap

CrafTap uses a unique system that allows the user to determine the amount of foam. Therefore, the user can reduce their waste down to 2-0% while utilizing 98-100% of the product in each keg. Pegas CrafTap being a manual system uses the same operating principle found in large beer bottling factories around the world; counter-pressure method. This method ensures the bottles are filled in the way that only automatic fillers can provide - without foam and at a rate two liters in just over sixty seconds.

- Fills growlers fast, 2 litres in just over 1 minute
- Eliminates oxygen in the bottle
- Reduces or eliminates
- Less than 2% waste
- Fits several bottle sizes
- Dispenses up to 4 beers

*Pegas CrafTap on a Kegbar*

TOLL FREE: 1 (866) 995-9965, www.beer-co.ca

# PEGAS CRAFTPAD

PEGAS CraftPad is an additional switching manifold to CrafTap that allows you to dispense up to 4 different beers from one CrafTap unit.

## Pegas CraftPad

CraftPad 2.0 is an additional device specifically designed for the PEGAS CrafTap filler. The PEGAS CraftPad uses 4 switching values to move between beers or other foamy beverages and to bottle them. The CraftPas has a 5th switching valve. Beer lines are connected to 4 valves and a $CO_2$ line to the fifth. The 5th line is used to purge the beer line with $CO_2$ to avoid beer mixing while bottling.

- Dispense up to 4 different beer brands
- Beer mixing eliminated
- Connects directly to Pegas CrafTap
- Two devices connect to make one unit

The CraftPad installs directly to the CrafTap

Switch View

# PEGAS CRAFTPAD LIGHT

- Dispense up to 6 beer brands from your CrafTap
- New unique design, more ergonomical
- Whole system is blown through after every pour

## Pegas CraftPad Light

PEGAS CraftPad Light is the new and advanced multi-dispense system for the PEGAS Craftap. The PEGAS CraftPad light is created to dispense up to 6 beer brands and other foaming beverages through 1 device. PEGAS has combined the key strengths of PEGAS CraftPad with modern design.

- Dispense up to 6 different beer brands
- Whole system is blown through after every pour
- Can be built into any horizontal or vertical surface
- Extra space to mark beer brands on CraftPad Light
- 30% lighter than the CraftPad
- CraftPad Light can be installed separately from CrafTap

The CraftPad Light can be installed on any surface

# GROWLER FILLING STATION

**NEW ARRIVAL**

- Growler Filling Stations come in a variety of lengths
- Can be used with growler fillers, towers, etc.
- Great for sampling and pouring

## Growler Filling Station

The Growler Filling Station is a great option for filling growlers and sampling beers or pouring pints. You can customize the station to suit your needs. The stations come in a variety of sizes to make it convenient for your location.

- Units come in 58", 68" or 94" length
- Can be used with a variety of different towers
- Can mount Pegas CraftPad or CraftPad Light
- Can store several different kegs for accomodation

# GROWLER WASHING STATION

- Two machines in one - dishwasher and bottle washer
- Hi-temp sanitizing bottle washer rack
- Washes and sanitizes
- Ideal for growler bottles, wine bottles, etc.

## Growler Washing Station

The Growler Washing Station is great for washing and sanitizing all shapes and sizes of bottles; this concept is ideal for Growler Bottles.

The racks are filled with a spray manifold system that places a strategically positioned spray jet inside the neck of each bottle. The washers rack has 9 compartments holding up to 6" diameter bottles. Each rack has a standard 20" x 20" footprint and rack height is determined by the size of the bottle and how many rack extenders are required.

- Great for washing and sanitizing
- Works with all shapes and sizes of bottles
- Racks are fittied with a spray manifold system
- Spray jets fit directly into each bottle
- Standard bottle washer rack has 9 compartments

**NOTE:** Graphics on machine is for show only

# PEGAS EVOLUTION FAUCET

- Beer Filler for all PET Bottles
- No cartridge required
- Foam free dispensing

**NEW ARRIVAL**

BFC-PEGAS-EVO

## PEGAS Evolution

The PEGAS Evolution Faucet device doesn't have a cartridge. Instead, it is equipped with a switch flow developed by the company and designed as a separate easily-detachable unit. If needed, it can be replaced as easily as a cartridge. It significantly simplifies seasonal maintenance – no need to completely dismantle device. Just disassemble it, thoroughly wash it, lubricate, assemble and keep on working. The whole process won't take longer than 2 minutes.

- Works on any type of PET-bottle
- No cartridge
- Lasts for at least 100,000 cycles

Evolution Faucet with a Dragon Tower on a Kegmaster 2

# Warranty Terms

UBC Group warrants that its products will be free from defects in material and workmanship, under normal use, regular service and preventative maintenance for 1 (one) year as described in the warranty. The warranty period for compressors is 5 (five) years as described below.

## PREREQUISITES

This warranty is available to the first end user for equipment purchased from UBC's authorized dealers. Equipment resold without such authorization will not be covered under this warranty.

All equipment must be properly installed according to guidelines found in the product manuals.

Approved usage conditions for operation must be provided as required in the product manuals (including but not limited to ambient conditions, dedicated power circuit and required clearance)

All equipment must be maintained and cleaned regularly as specified in the product manual.

In case of equipment failure customer must contact UBC Group for repair authorization number before any repairs are made.

Warranty claim form must be completed in full and submitted to UBC Group at the time of purchase.

## WARRANTY PERIOD

Warranty period is one (1) year from the date of installation but no longer than eighteen (18) months from date of sale. Compressor warranty period is five (5) years from the date of installation or sixty eight (68) months from the date of sale from UBC Group.

A warranty stub or documents of sale from distributor must be submitted for units not sold directly by UBC for warranty to be valid.

## WARRANTY COVERAGE

Refrigeration Units (including compressor)

If a product is deemed defective by UBC group within the warranty period described above, UBC Group, at its discretion, will either repair or authorize the repair of the product. UBC Group will be responsible for the labor charges according to the Labor Charges segment within the warranty period provided that all above mentioned prerequisites are satisfied. UBC Group may also replace the product at its discretion bearing the labor costs for the product replacement according to the Labor Charges segment. The customer is responsible for the return of the defective part or product to UBC Group for inspection and defect determination. Customer must package the part or product according to the instructions provided by UBC Group before shipping it. UBC Group will cover the shipping costs for the part or product as described in the Shipping segment of this warranty.

## COMPRESSOR

Compressors are covered for an additional Parts Only warranty for a period of four (4) years beyond the general coverage described above. Under the additional coverage if a compressor is deemed defective by UBC Group, providing that all of the prerequisites described above are met, it will be exchanged for a new compressor. UBC Group will not cover the labor charges associated with the compressor replacement. It is the responsibility of the customer to return the defective part to UBC Group. The customer must return all parts of compressor and package the part according to the instructions provided by UBC Group before shipping it. UBC Group will cover the shipping costs for the part as described in the Shipping segment of this warranty.

The customer has the option to send the unit to UBC Group for compressor replacement and in this case will be responsible for all shipping charges. There will be no additional charges by UBC Group for the compressor replacement.

## DEFECT DETERMINATION

UBC Group is the only body authorized to determine defects. Customers must contact UBC Group to receive authorization for any course of action prior to any repairs. A warranty claim form must be completed and submitted to UBC Group in order to process the claim and authorize any reimbursements. If a repair is made without an authorization number from UBC Group it will not be covered by the warranty and will not be reimbursed.

If a part or product is authorized for return it is for inspection purposes only. It is the sole discretion of UBC Group as to whether or not a credit/refund will be allowed.

UBC Group's determination of defects is final.

## PRODUCT DELIVERY

The customer is responsible for inspecting units upon receipt for concealed damage caused during shipping. The customer must report damaged/non-working units or components to UBC Group immediately. Deliveries with physical damage should be denied. A claim must be filed with the carrier for any damages that occur during shipping. UBC Group is not responsible for units damaged during shipping.

## WARRANTY DOES NOT COVER
- Physical damage or water damage to the unit caused by negligence of the user.
- Improper installation and modifications made without UBC Group's explicit approval.
- Damage resulting from electrical supply, water supply, drainage, flood, storm or any other incidents.
- Repairs made without the explicit authorization of UBC Group or without the submission of the warranty claim form.

Note:
UBC GROUP IS NOT RESPONSIBLE FOR ECONOMIC LOSS OR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, INCLUDING, WITHOUT LIMITATION, LOSSES OR DAMAGES ARISING FROM FOOD OR PRODUCT SPOILAGE CLAIMS AS A RESULT OF REFRIGERATION FAILURE.

## SHIPPING
During the warranty period UBC Group will be responsible for shipping charges as describe in the previous segments. UBC Group will ship replacement parts using standard ground shipping only. Refrigeration units will be shipped on pallets ground freight (LTL) only. If expedited shipping is needed the customer will incur the difference in shipping cost.

# Return Policy

UBC Group will accept returns for items within 30 days from the date of delivery. Returned items must be unused, in original condition and packaging, and must include all documentation and accessories. Special orders, custom orders are subject to 25% restocking fee. Closeout items cannot be returned.

A return authorization must be obtained from UBC Group for any merchandise return. Packages without a return authorization number on them will not be accepted. "Authorization for return" is for inspection purposes only. It is the sole discretion of UBC Group as to whether or not credit/refund will be allowed. A minimum 15% restocking fee will be applied to all authorized returns.

The customer is responsible for all shipping charges. Authorized returns must be sent prepaid shipping only. Collect and COD shipments will be refused.

## SHIPPING
Most orders are shipped within 1 to 2 business days via a preferred shipping company. All goods are shipped from our central warehouse at 1143 Haultain Court, Mississauga, Ontario. Shipments are FOB Origin with freight charges prepaid and billed. The shipping charges will be added to the invoice. Some heavy or large items must be shipped LTL Freight. Freight carrier delivery is to back of truck and does not include carrying the item into the building, unpacking or lift gate service to unload the shipment. If a dock or forklift is not available, lift gate service is available for an additional charge. Deliveries are made Monday thru Friday, excluding holidays.

## RECEIVING MERCHANDISE: FREIGHT CARRIER
Upon delivery, carefully inspect the contents of the shipment for any indication of damage before signing the carrier's bill of lading. The driver is required to be present during the inspection. If damage is found, the shipment should be refused and the carrier is required to take the shipment back. If the outside packaging is damaged but the contents are not, you should accept the shipment and make a note on the freight bill that the outside packaging was damaged. This will protect your rights in the event of a concealed damage claim.

By signing the carrier's freight bill without any notations of damage, you are agreeing that the shipment was delivered in good condition. Any damage found after that point, should be directed to the freight carrier in the form of a concealed damage claim. UBC Group is not responsible for freight damage claims once the shipment was signed for as received in good condition. UBC Group's responsibility ceases upon the shipments acceptance by the recipient.

## RECEIVING MERCHANDISE: PARCEL SERVICE
Inspect the shipment upon delivery before accepting it. If your shipment has arrived damaged, incomplete or otherwise tampered with, notify your delivery person immediately. Customers are responsible for checking their order when it arrives to ensure that all items are present. If shipment has arrived complete and undamaged but there are discrepancies, please notify us immediately (within five business days). UBC Group is not responsible for missing or damaged items unless notified by the customer within the allowed period.
